FUSION MESOTHERAPY XPERT

The XPERT is a new concept in non-invasive aesthetic medicine. An advanced approach to Mesotherapy based on a combination of electroporation & photo bio-stimulation, which enhances the transportation of products through the epidermis to the dermis via cellular pores. This process allows product to reach the heart of the cells, at the same time emitting an LED light to activate certain biological functions of the skin and the cells.

No-needle Mesotherapy device

The Fusion Mesotherapy XPERT treatment is suitable for patients wishing to treat conditions such as:

- Aged flaccid skin
- Wrinkles
- Expression lines
- Dark eye circles
- Eye fat bags
- Hyper pigmentation
- Double chin
- Cellulite
- Localised fat
- Stretch marks
- Aged skin (body)
